

# DPX-F CNG model dispenser

*Compressed Natural Gas (CNG) dispenser*

## Description and performance

The new **DPX-F CNG** innovative dispenser, combining advanced technology and compact design, has been designed and manufactured to deliver natural gas, nowadays promoted worldwide thanks to its ecological characteristics and economical benefits.

The **DPX-F CNG** dispenser ensures excellent operating quality and high reliability resulting from Dresser Wayne Pignone's extensive manufacturing experience and constant technological updating in the Oil&Gas market.

The **DPX-F CNG** dispenser can be single- or multi-bank.

## Functional data

Metering accuracy		± 1%
Number of nozzles	max	2
Flow rate	max	75 kg / min
Nominal working pressure	max	250 bars

## Main components

The **DPX-F CNG** includes the following main components.

- **Manual ball valve**, preventing gas from entering the dispenser during maintenance operations.
- **Particulate filter**, optimizing gas flow and preventing any deposit of particulate.
- **Massflow meter**, ensuring high metering accuracy, constant in time, and providing communication with the electronic computing head.
- **Motorized valve**.
- **Manometer**.
- **Flexible hose**, CNG resistant.
- **Delivery nozzle**.
- **Electronic computing head** made by Dresser Wayne Pignone. The computing head is provided with electromechanical and electronic totalizers for volumes/amounts and allows remote connections.

## Overall dimensions

## Options

- Electromechanical totalizer
- Twin-hose for delivery and vent
- Breakaway
- Temperature compensation
- Safety pressure transducer

## Approvals

The fuel dispenser has been designed and manufactured according to ATEX 94/9/EC Directive and other applicable European Directives and technical standards, as well as in compliance with W&M regulations.
